DETAILED ACTI N

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 27-53 rejected under 35 U.S.C. 103(a) as being unpatentable over Prosise et al or Gan et al.
- 3. Patentees disclose making a moldable article comprising a thermo-malleable material and foams (Gan et al) wherein susceptors such as metals or metal oxides are incorporated therein. See col. 9 line 20 et.seq. of Prosise et al and col. 5 lines 14 thru 52 (particularly lines 45-52).

It is deemed that the claimed results would be inherent from the compositions disclosed in the references.
